

Business Engineering Systems – four main components / views / perspectives

Get to know and explore the potential

- Offerings
- Processes
- Prerequisites
Structuring
Locating
Build up

More complete navigation instruments and indicators

- Focus also on income not only on costs
- Performanceprofile
- Indicators for Intangible Assets
- Valuing enterprise, Vector Metrics
- Balance of power, potential, energy

Find opportunities for new businesses that generate quick income.

- Actions for complementary strategies
 - develop, carry out
 - new perspectives and communicate instruments

New combinations of existing primary resources

A clear view in complex transactions and networks (Value Generating Network).

- Engineering and optimization of superimposed control loops in the economy.
